Itinerary

Meet and Greet – arrival day

You will be transferred from Hoedspruit airport by our private road transfer to Orpen to meet Neil. After settling into your cottage, you will get onto our open-sided safari game viewing vehicle for your first gamedrive.

Orpen restcamp (restcamp/north western Kruger)

14 TO 16 JUNE 2019 (2 NIGHTS)

The area around the camp allows for watchings the nomadic Senegal (Lesser Black-winged) Plover, and, on a few occasions, Montagu's Harrier. White-faced and Comb (Knob-billed) Ducks, Little Grebe (Dabchick) and Lesser Moorhen, African Rail and African Crake, as well as Woolly-necked, Marabou, Open-billed (African Openbill), White and Black storks may all be seen in the camp and surrounding areas. Additionally, the camp is home to a wealth of raptors, shrikes, nightjars and owls.

Your accommodation consists of two x two-bedded en-suite units that each sleep two people, serviced with fresh linen and towels.

Satara (restcamp /central northern Kruger)

16 TO 19 JUNE 2019 (3 NIGHTS)

Situated in an excellent game viewing area, Satara has relatively open bushland and the game is plentiful and diverse. Satara camp itself has a rustic charm, with the accommodation set out in a series of circles. Satara camp is well wooded and the bird-life is prolific. At night the clink of fruit bats is fused with the chirping of cicadas and crickets. Owls and nightjars add to the symphony that is punctuated by the whoop of hyena, the screech of jackal and the roar of lion.

Accommodation consists of two three-bedded units (includes fresh linen and towels) that each sleep two to three people.

Olifants (camp/north eastern Kruger)

Our open safari vehicle

19 TO 22 JUNE 2019 (3 NIGHTS)

This camp is ideally situated in the central Kruger NP. Our drives and activities include several dams, open savanna and thorn thickets with some amazing riverbeds and pools to explore. Elephants, lion and buffalo are prolific in this area as well as the endangered cheetah.

Night time at Olifants plays host to unbelievable African wildlife sounds, and you are sure to see many animals at the waterhole by simply sitting in the game viewing hide for an hour or two. Bird watching is also prolific. A resident troop of baboons is always seen foraging around the camp in the evenings.

Accommodation is a two-bedroomed private en-suite cottage (fresh linen and towels included) that sleeps four people.

Mopani Camp (restcamp/north western Kruger)

22 TO 23 JUNE 2019 (1 NIGHT)

The pervasive Mopani tree found in the Pioneer Dam area of Kruger National Park lends both its aesthetic and its name to this primary rest camp. Thatched buildings with rock faced walls blend seamlessly into the natural environment, materials used to construct these buildings including rough stone, wood and thatching-grass.

Huddled against and overlooking the banks of the dam, visitors can take advantage of the winter trend for park animals to move towards water sources as they migrate towards the dam's edge, providing excellent viewing opportunities.

The Tropic of Capricorn loop and the Nshawu pans areas allow for game viewing from open plains which host blue wildebeest, Burchell's zebra, buffalo and the rarer tsessebe, as well as the smaller Black-Backed Jackal and caracal.

Accommodation is in a private guest house with four en-suite bedrooms that each sleep two people, which is serviced with fresh linen and towels. It also has its own private outside entertainment area and bush views.

Departure day We always fit in an early morning game drive, and of course, a hearty breakfast before departure to Phalaborwa airport.
